Hong Kong Coordinator

Dr. Linda C.H. LAI (Project Experimenter @ Floating Projects)

Linda Chiu-han LAI, Associate Professor in Intermedia Arts at the City University of Hong Kong's School of Creative Media (SCM), is a research-based interdisciplinary artist. After completing her Ph.D. in Cinema Studies at New York University, she has sought meaningful connective extension to other relevant artistic and theoretical endeavors. She persists in artistic creation as the practice of theory. A critical researcher of the History of Everyday Life, her works focus on historiography, visual and auto-ethnography, urbanity and popular culture. Her teaching revolves around the criticality of micro/meta narrativity. She has also designed, at SCM, Hong Kong's first courses in visual ethnography, sound art and generative art & literature at the university level. She founded the HK-based new media art group the Writing Machine Collective (2004) and has completed 6 major group exhibitions on questions of computational thinking and contemporary art. Though broadly known for her videography in the international art venues, she creates in different artistic mediums to turn art-making into criticism, history-writing, gaming and voyages of discovery. Her digital and non-digital works have been shown in key venues in many cities in Europe, Asia and the US, including the International Short Film Festival Oberhausen, the Open City London Documentary Festival, LOOP Barcelona,

Rencontres Internationales Paris/Berlin, the Jihlava International Documentary Film Festival in the Czech Republic, the Fourth State of Water (CoCA, Torun, Poland), Women Make Waves Film Festival (Taipei), International Centre (New Delhi), and the various Experimental Film/Video Festivals in Seoul (EXiS), Taipei (EXiT), Macao (EXiM), Kuala Lumpur (KLEX) and Hong Kong (HKEX). Lai considers herself a montage artist: to her, images are intensely rich perceptual surfaces that defy the binary division of representation and abstraction. Many of her works also deploy the notion of an archive and self-archiving, including her large-scale installation "1906-1989-2012: Guangzhou-Hongkong-Shanghai-Anji," commissioned for the 9th Shanghai Biennale 2012 at the Power Station of Contemporary Art, which is also a piece of experimental history playing with childhood memory, the use of everyday objects and folk material, the postal history of Hong Kong and family stories. Lai seeks for intermedia moments and modes of connectivity, be it conjugation, modulation, combinatorial logic, or permutation... Her recent projects include *Mnemonic Archiving* (Singapore 2016, Hong Kong 2017) and *Lost Texture* at H-Queen's "Exit Strategies." She is also working on a research project on HK's animation history with Winnie Yan and Terrie Cheung, and the Manifesto project on videography with Elaine Wong, Emilie Choi and Winsome Wong, both to advance Floating Projects's scope of experiments. Floating Projects (2015-) is her experiment on modes of sustainability in art-making and artists' associations.
